We will discuss the symbolism as we view the masterful craftsmanship of the beautiful depictions that cover the walls of the ancient Seti I temple that is dedicated to Osiris. Behind this Temple lies the megalithic Osirion, similar to the Valley Temple in Giza, that the indigenous tell us is 35,000-50,000 years old or more. It is here that several depictions of the Flower of Life can be seen on the huge pillars. Local villagers claim that the water that accumulates in this structure has valuable healing properties.</p> <p>After lunch in Abydos, we'll drive to Dendera to visit the incredible Temple of Hathor Star. The maps, depicted on the ceilings in this temple, and the replica of famous Dendera Zodiac (the original is displayed at the Louvre in Paris) point to the ancient origins of astrology and superior knowledge of our universe. Hathor (Het-Hert), the Neter who personified motherhood, beauty, sexuality, love, joy, harmony, dance and music was often associated with the planet, Venus. She was known as the Lady of the Stars, and represented the nurturing solar food of the Sun's rays, required for birth, growth and renewal. What other secrets lie within this magnificent structure?</p>
